Tool No: 3.1.2 Model

SEC-TOOLBOX

Tool Category no. 3.1 Project Feasibility Analysis

Overview	
ID-number	3.1.2
Name	EnergyPRO 3.3
Date	N/A
Type	Model
Language	English, German, Danish
Developer	EMD international A/S (Denmark)
Contact Data	www.emd.dk

Description

A complete modelling software package for combined techno-economic design, analysis and optimisation of both fossil and bio-fuelled cogeneration and trigeneration projects as well as other types of complex energy projects. Simulation and optimization according to market constraints and active use of thermal storage
