Tool Category no. 3.2 Project Design

Overview	
ID-number	3.2.8
Name	Ready Reckoner
Date	N/A
Type	Model
Language	English
Developer	Department of Industry Science and Resources and the Australian EcoGeneration Association. (Australia)
Contact Data	www.eere.energy.gov

Description

Ready Reckoner' is a program to assist users with a "first pass" technical and financial analysis of cogeneration at their site. The program is a 'Ready Reckoner' intended for quick preliminary evaluations. Refer to the Disclaimer section of this manual. The Ready Reckoner conducts a simple technical and financial analysis of a cogeneration opportunity. Should the cogeneration opportunity appear attractive on this evaluation, then it is recommended that the user conduct more detailed analyses, or engage suitable advisers, to consider the project evaluation to the extent necessary to commit funds or to entertain alternative.
