**Tool No: 3.3.1 Model**

**SEC-TOOLBOX**

Tool Category no. 3.3 Scenario Analysis

Overview	
<b>ID-number</b>	3.3.1
<b>Name</b>	EnergyPlan
<b>Date</b>	N/A
<b>Type</b>	Model
<b>Language</b>	English
<b>Developer</b>	Aalborg University
<b>Contact Data</b>	<a href="http://www.energy.plan.aau.dk">www.energy.plan.aau.dk</a>

**Description**

Large-scale intermittent electricity supply systems. The EnergyPLAN model is a computer model for Energy Systems Analysis. The model has been developed and expanded on a continuous basis since 1999. With EnergyPLAN you can analyse the consequences of different national energy investments and design suitable national energy planning strategies. The analysis is carried out in hour-by-hour steps and the consequences are analysed on the basis of technical regulation strategies as well as market economic optimisation strategies.
