Name	Keep Focus
Date	2006
Type	Software (Commercial)
Language	English
Developer	Keep Focus
Contact Data	www.keepfocus.dk/pg_04_00.asp

Description

The company Keep Focus has developed two software tools:

[Agenda2100](#)

Agenda2100 is the ideal energy management tool for organisations such as municipalities and medium to large companies. Here you can combine automatic meter readings with manual entries, and analyse/survey the organisation's electricity, water and heat consumption.

[EnergyGuard Web](#)

EnergyGuard Web is the easy-to-use visualization platform for the EnergyGuard meter reading hardware. You don't need any knowledge of energy management to make sense of the simple charts that are designed specifically to help you reduce energy consumption
